## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 11-20, drawn to spacer for a liquid crystal display (LCD), a method of producing a spacer for a LCD and a LCD using the above spacer.

Group II, claim 10, drawn to a method of measuring the contact angle of water on spacers for a liquid crystal display.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II is directed to a method of measuring the contact angle of water on spacers for a liquid crystal display, not to one of the processes being considered to have unity of invention, as specified in 37 CFR 1.475.

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
